

EASYMOD AE-080UM SERIES MEDICAL SWITCHERS

80 watts - 3" x 5" - Single to Quad Output

IF WHAT YOU WANT IS WHAT YOU NEVER GET IN MEDICAL INPUT SWITCHERS, the POWER SOLUTION for up to 80 watts steady state of high reliability, 90-264 VAC input power can be found in the AE-80 family of 3.2" x 5" U-Channel mounted EASYMOD switchers. These models are available as standard in a complete range of single to quad output configurations from 2 to >48 VDC. All models deliver 80W (95W peak) of highly regulated output power. Most models deliver continuous full power output to 50°C, and are capable of operation up to 70°C. EASYMOD simply means: IF WHAT YOU SEE IS WHAT YOU DON'T WANT, IT CAN BE EASILY CHANGED. EASYMODS include; extended temperature operating range, isolated outputs, unique output combinations, universal AC input, remote sense, low noise versions, unique cables and harnesses and much, much more. All these modifications are available at nominal (if any) additional cost, and normally without any impact on safety agency approvals which reduces both development cost and time to market. An EASYMOD can be performed on supplies for programs requiring as few as 250 units per year.
